

PLASTIC TYPES

Each of our plastics offer unique characteristics to match the varied needs of throwers and the diverse environments encountered on different disc golf courses.

STAR

Our special blend of resilient, grippy polymers with outstanding durability and superior feel.

HALO STAR

Vibrant, pearly rims contrasting a colored center, made with a special blend of premium Star plastic.

GSTAR

A durable blend of Star that adds flexibility and even more grip. Our favorite choice for colder weather.

CHAMPION

Outstanding performance and durability, distinguished by a beautiful clear appearance.

BLIZZARD

Microbubble Champion plastic in low weights! Most models lighter than 135g float in water.

XT PRO

A tough blend with maximum grip. Great for putt and approach discs.

PRO

Increased durability over DX with an enhanced grip when compared to Champion plastic.

KC PRO

Developed for 12x World Champion Ken Climo. A favorite putter & midrange plastic of many pros.

R-PRO

Softer than most Pro blends. R-Pro has the best all-condition grip and an improved feel.

JK PRO

Developed for 5x World Champion Juliana Korver. Known for its soft, grippy feel.

DX

DX offers the widest selection of models and weights. Affordably priced with good grip.
