

**Genesis™ Distance Driver**

A pure, high caliber, 22mm rim profile and subtle streamlined Excelerator™ contours provide exceptional speed and delivery. The CHING® Genesis™ driver reflects several years of patience and development exploring D.R.A.F.T.™ technology. The result is a very fast guaranteed go-to driver for Professional Level competitors. Rated at a full point above USG™ 'stable', this model is bank off the shelf and can be experienced into a money workhorse.

Production Plastics: Power  
Production Weights: 165-175 grams

**Velocity™ Fairway Driver (Control Distance)**

CHING® VELOCITY™ is the absolute best choice for accuracy on long drives and downwind distance. A smooth release with even tempo yields reliable stable flights, with plenty of opportunity for big-arms to hold the hyzer or work this disc over on long high annies. If you've got the juice to make it cruise, the Excelerator™ D.R.A.F.T. system will lead you straight down the fairway with a subtle low speed return. Dial in the right grip position to match your style and you'll see why the Velocity™ name speaks for itself.

Production Plastics: Power, Supreme  
Production Weights: 165-175 grams

**Legacy™ Multi-Purpose Midrange**

The CHING® Legacy™ Midrange is a retro traditional 'smooth top' model that satisfies a range of stability demands with exceptional control and respectable glide. Retooled profile for less hi-speed turn than the Oracle™. An excellent choice for anyone that just can't seem to find their 'groove' using advanced Excelerator™ technology.

Production Plastics: Power  
Production Weights: 165-175 grams

**Oracle™ Multi-Purpose Midrange**

Finally available in diverse colors and weights, this reliable CHING® middy offers consistent grip, release, and accuracy. The Oracle's™ unique 3-point Excelerator™ pattern features larger edge radii, with contours designed for more power and higher launch speeds. Controllable flights with modest return make this a favorite for moderate arm-speeds.

Production Plastics: Power  
Production Weights: 165-175 grams

**Precision™ Multi-Purpose Midrange**

Precision™ is a moderate arm-speed, stable, midrange flyer that completes a smart set of discs for fun on the course with the Juju™ Putt & Approach and the Velocity™ Control Driver. This series features a 9-point Excelerator design (5 different thumb positions + 'open' position) that makes it easy to learn grip consistency and develop power.

Production Plastics: Power, Supreme  
Production Weights: 165-175 grams

**Juju™ Putt & Approach**

CHING® JUJU™ is a multi-purpose short range golf disc suitable for putting and approaching. It has a flat sided rim for more target surface contact & friction, and to slow it down for controlled upshots. The flight is designed to be neutral in stability with minimal fade so you'll land flat where you aim. The rim depth is similar to typical putter profiles, but is comfortably enhanced by the Excelerator™ contours. Perfectly balanced for up to 200' accuracy.
